# 2_Struts2 - Problem Assignments

## Problem Scenario:

Spec Enterprise Ltd, plans to provide an online facility for senior managers to view the details of their Regional Managers and details of the Store Managers under a particular region.

The application should accept the regional manager id from the user. On submission of the form, the following details should be displayed: Regional Manager Name, Region Name(NORTH or SOUTH etc.) and the list of stores under that region (CHENNAI store, MUMBAI store etc).

After selecting a store from that region, when the user submits the form, the following details should be displayed in the next page. Regional Manager Name, Region Name, Store, Store Manager ID, Store Manager Name.

Your UI should like as given below.
